

Instructions for submitting samples for test of anti-rabies serum antibody titres (SVNT)

Rabies, Research Centre accepts human serum samples for test of anti-rabies serum antibodies and the same is done through SVNT test. The samples for the test are accepted in either of the two listed ways:

- a. The patient/ individual can visit CRI, Kasauli Treatment Centre from Monday to Saturday (except Second Saturday and Public Holidays) between 9.30 a.m. to 4.30 p.m. and get the blood drawn for the test.
- b. Serum samples (labelled and sealed) can be shipped to C.R.I. Kasauli (at 2-8°C) in the name of **Director, CRI, Kasauli** clearly labelled as **"Samples for SVNT; Kind attention: Rabies Research Centre"**.

Note: The patient history and the details of immunization of the patient with ARV need to be enclosed with the samples. Also, contact no. & address of communication of results must be included.
